# **GLOBAL CUSTOM COMPLETE REBUILD**

Global Custom Complete Rebuild maintains the highest level of quality and reliable machines, which cuts your operating budget on a cost-per-hour basis by 50% or more. Improve profitability for our clients as part of Global's core values.

## **GQP PERFORMANCE ENHANCEMENTS**

- Up to 10% fuel economy increase
- Up to 10% horsepower increase
- Up to 15% torque increase
- Improved economy
- Improved production
- Improved bottom line

Unbeatable pound, per dollar value.

## **GQP Up to 50% off Preventive Maintenance & Repair Products**

GQP makes it easy to maintain your machine with the highest quality parts in the industry at the lowest prices, whether you do the work yourself or want the experts at Global's Engine and Component Reman division to assist, with improving the equity and value of your machine as well as the balance of your machinery, this will assist in reducing downtime in your fleet, which will relay your company into greater profitability every year.

## **GQP Genuine Parts**

For all Global Custom Complete Rebuilds, only GQP Genuine Parts are used, and for good reasons.

- Genuine GQP (Parts) increase Engine & and component life up to 50%.
- You get up to 80% lower fuel injector costs per hour with GQP filters.
- When paired with GQP fluids (optional), you get a 2x longer engine working life.

# SECOND LIFE PROGRAM

Our remanufacturing facility allows us the optimum ability to recycle/reuse engines, components, etc., and reduce waste. Our ability to completely rebuild machinery at wholesale pricing with OEM quality parts. Global can rebuild your machinery from the ground up cost-effectively, which enables machinery that would normally be at its end of life & ready for waste to become once again a viable asset. Doing so also increases the resale value of the machinery. We are currently working on a program to extend max life of machinery. We recycle oil, filters, plastics, metal, wood, cardboard, & paper. This is our contribution both, to the environment & our valued clientele.

## THE SECOND LIFE

Our custom complete rebuilds program involves a complete overhaul from top to bottom, where the equipment is disassembled down to the frame and all non-metal parts are replaced.

This leads to an outcome that's comparable to purchasing a brand-new machine but at a significantly lower cost.
